Are You a Hazmat Employer? What to Know to Stay in Compliance

11:00 a.m. - 12:00 p.m.
January 26, 2021

There are a lot of agencies that regulate hazardous materials. Primarily, we will discuss the Department of Transportation training requirements for handling of hazardous materials which include shipping, receiving, and handling. We'll also discuss the different labels that are found on containers of hazardous materials, as well as labeling and placarding requirements for bulk and non-bulk shipments. For example, are GHS labels acceptable for non-bulk containers? This webinar is considered General Awareness training for Hazmat employees.

- To receive one hour of online training credit for BWC programs, provide a BWC policy number during registration.
- When your registration is complete, you will receive a confirmation email with instructions for joining the webinar. You can click the link at any time and go to the log in page.
