

The Workers' Compensation Group Experience Rating enrollment period is here!

The Chamber is proud to partner with The Hunter Consulting Company to offer this important member benefit! **The top discount is 53% and most of companies see \$1,000s of savings each year!!!**

In addition to the discounted rates, Hunter Consulting is known for providing professional and **aggressive claims management**. Every Hunter client receives a **dedicated account manager** who serves as a single point of contact. We also provide a range of services not typically provided by other TPAs - **attorney representation at Industrial Commission hearings**, settlement & handicap reviews, guidance through BWC audits, and semi-annual safety training.

Hunter Consulting also operates a fully staffed Unemployment Compensation Management Department to assist in all employment related issues. With the ongoing COVID-19 pandemic, having a management program in place to navigate the volume of claims and changing regulations is becoming a necessity. Pricing for this program will be a separate (*optional*) line item on the Group Experience Rating Projection Packet.

Current clients should expect to receive their renewal packets before the end of the month.
